

Fork Lift Truck Inspection System

Quick and easy to use, this system ensures pre-use checks are recorded fully and frequently and that unsafe trucks are identified, to the operator and the entire workforce.

All material remains with the truck at all times and a detailed inspection history is on hand when required.

STEP 1

Remove the inspection book from its protective wallet within the yellow paddle.

STEP 2

The operator carries out the inspection of the truck completing all areas of the record slip.

STEP 3

Slip is removed from 'cheque book style' record book, leaving a carbon copy as a record.

STEP 4

Completed slip is placed in the small wallet, in the front pocket of the paddle to show that the truck is safe/unsafe to use.

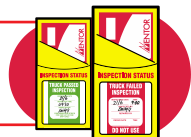

STEP 5

The book is returned to its wallet and placed back into the paddle.

STEP 6

Display the green side if the truck passes or the red side if it fails, to warn others that the truck is unsafe.

Pre use checks should be carried out by the operator at the start of each shift or when taking over another truck. They help ensure that the equipment is in a safe working condition, reducing the risk of an accident.

Suitable for both indoor and outdoor use, our inspection system can be fitted to each of your trucks and remain attached at all times.

Each pack includes: 50 sheet inspection record book, double pocket yellow paddle for storage, two waterproof wallets (for the book and completed slip) and a cable tie.

Pre-use Checks Inspection Pack

6 X Inspection Books

1 X Paddle

1 Large Wallet

1 X Small Wallet

1 X Cable Tie

£39.30

(components also sold seperately)
